

105 Aerial Terminal Replacement Covers

Cost Effective Replacement Covers for the Western Electric 105

- Easy Installation
- Tough Plastic Construction
- No Special Tools Required
- Proven Reliability
- Cost Effective

Benefits

Easy Installation

The 105 Replacement cover is installed by placing the cover over the splice terminal, and snapping it shut into place. This process will not interrupt the existing splice.

Cost Effective

Could virtually save thousands of dollars or more, on expensive labor and new closure costs.

Easy to Use

Manufactured to exact specifications, these covers are a perfect fit every time!

Safe / Durable

Constructed of a high grade durable plastic, the 105 Aerial Terminal cover also comes with a security bolt, which will make the copper splice inaccessible by unauthorized personnel.

Description

The 105 Series Replacement Covers are molded of a high-strength corrosion and UV resistant plastic. It contains an integral “Living Hinge” which minimizes the chance of moisture entering the terminal. Also, it allows the lid to remain open during re-entry, and is secured closed with plastic snap latches.
