

## ***BUTT SPLICE CASE***

Give Your Splice Low Cost Ab-

- **Positive Protection**
- **Water Tight**
- **Easy Re-entry**
- **Very Economical**
- **Re-entry in 5 min or less**

### **Benefits**

#### **Time & Cost Savings**

Uraseal Butt Splice Cases can be installed in about half the time required for other types of closures or tapes, and for a fraction of the cost

#### **Easy Re-entry**

This closure can be removed from and replaced on a completed splice in only 5 minutes, with no special re-entry kit needed.

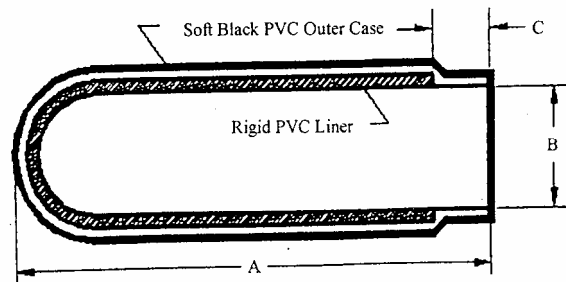

#### **Watertight**

The Butt Splice Case has an absolute water tight seal.

### **Description**

Uraseal Butt Splice Cases are designed to be used indoors on telecommunications house cable, or outside for fast economical protection. These closures are constructed of a tough, rigid inner liner. The tough inner liner will give your splice “mechanical protection.” A softer outer layer is then added to give the Butt Splice Closure an outer shell that extends beyond the base of the liner to create a water tight seal. When the stainless steel clamp is tightened, the soft outer layer shell will then conform to either the tape wrapping or the grommet and seal the splice. The Butt Splice Case can also be made available with a custom grommet insert for either indoor fire retardant or outdoor applications.

# Butt Splice Closure Cases

Product	Length A	Inside Diameter B	Clamping Area C	Units / Per Carton	Approx. Shipping Weight (lbs.)
